

El Cheikh Moulay Bencherif Middle School - Sidi Ali

Date: Sunday, February 25th, 2018

Duration: 2 Hours

Read the Text Carefully:

Life in the future will be different from life now. Technology will improve our lives. Many changes will take place in every field. New inventions and discoveries of other planets will appear. Man will send more spaceships and may find life possible there. People may be able to book their holidays in space. Food production will increase and cures for many diseases such as: cancer and AIDS may be discovered.

New sources of energy will be found. Computers will be widely used in all fields; especially in education. Means of transports will be faster and more comfortable.

Schools will be completely different in the future. The ministry of education cares about creating good citizens and healthy young generations as well. More attention will be given to sport. Computers will be used more widely. Every student will benefit from internet in all aspects of his life. Therefore, the students will be encouraged to take part in doing scientific research. This will persuade them to visit libraries more often.

Distance learning or correspondence course will also be a feature of the future. Students can study everything while they are far away from the school. They can take tapes or CDs to enable them to study their subjects at home. We can imagine a more different shape of school than that we see nowadays. In fact, life will be very complicated and Man will depend completely on machines. No one can be sure if life in the future will be better or worse.

Part One (14 Points)

Section One: Reading Comprehension (07 Points)

Activity One (02 pts): Match each heading with the corresponding paragraph.

Headings	Paragraphs
- Schools in the future	- Paragraph 3
- Distance education	- Paragraph 4

/i:/	/a:/	/ɔ:/	/u:/
sea	start	port	cool
feel	farm	court	cute
clean	smart	sort	tube
<i>meet / team</i>	<i>car / park</i>	<i>sport / fork</i>	<i>school / food</i>

Part Two (06 Points) - Written Expression

Article for the School Magazine: Embrace Technology for a Brighter Future!

There is no doubt that we live in the age of science and technology. With the invention of computers, the internet, and so many communication devices, the world has become a small village.

Technology plays a vital role in transforming our education. The invention of computers and the internet has made many things possible for students and teachers alike. People use computers for different reasons, such as searching for information, communicating, and managing tasks.

If students use technology properly, they can get information and knowledge in a short time. Furthermore, computers help us do homework, perform complex calculations, and design pictures. They are also essential tools to prepare lessons and examinations effectively.

To achieve academic excellence, all schools and universities should be provided with computers and reliable internet access. Let's embrace technology to build a smarter generation!

— Mrs. FB Kh
